Touareg 190TDI Premium with optional Innovision package shown.

Exterior

With its perfect proportions, smooth contours and purposeful styling, the Touareg range has been designed for maximum visual impact. No matter the angle it's viewed from, Volkswagen's latest SUV offers a bold statement of intent – this is a vehicle that looks as good as it performs.

Wider and longer than its predecessor, the Touareg is nevertheless lighter thanks to the combination of aluminium and high-tech steel used in its construction.

The Touareg's strong silhouette is assisted by its longer bonnet, which extends down to LED headlights in the 190TDI variant and new IQ. Light Matrix LED headlights in the 190TDI Premium variant set either side of an assertive front grille. Chrome strips extend from the Volkswagen roundel, framing the headlight and grille assembly and presenting an attractive facade to oncoming traffic.

The chrome theme continues down the length of the vehicle, with chrome highlights featured around the window frames and lower body side mouldings. A bold character line draws the eye from front to rear, emphasising the Touareg's sleek profile and powerful, sculpted shoulders.

Perfectly complementing the vehicle's dynamic appearance are striking 19-inch 'Osorno' alloy wheels in the 190TDI, with larger 20-inch 'Montero' alloy wheels a feature of the 190TDI Premium variant.

The back end of the Touareg is all style and practicality. Premium LED taillights on the 190TDI Premium sit broadly across the rear panels and tailgate, offering a sense of cohesion and minimalist design. The Touareg's electronic tailgate with Easy Open & Close takes the hassle out of opening the boot, while under the tailgate are eye-catching chrome trapezoidal tailpipes set either side of a sporty diffuser.

Perfect aesthetics and impressive design features front to rear come together to create an SUV with palpable on-road presence.

Interior

The Touareg's sophisticated and comfortable cabin is the perfect match for its sporty and dynamic exterior styling. Spacious design, impressive fit and finish, and an array of technological conveniences combine to create a driving experience that is at once luxurious and deeply satisfying.

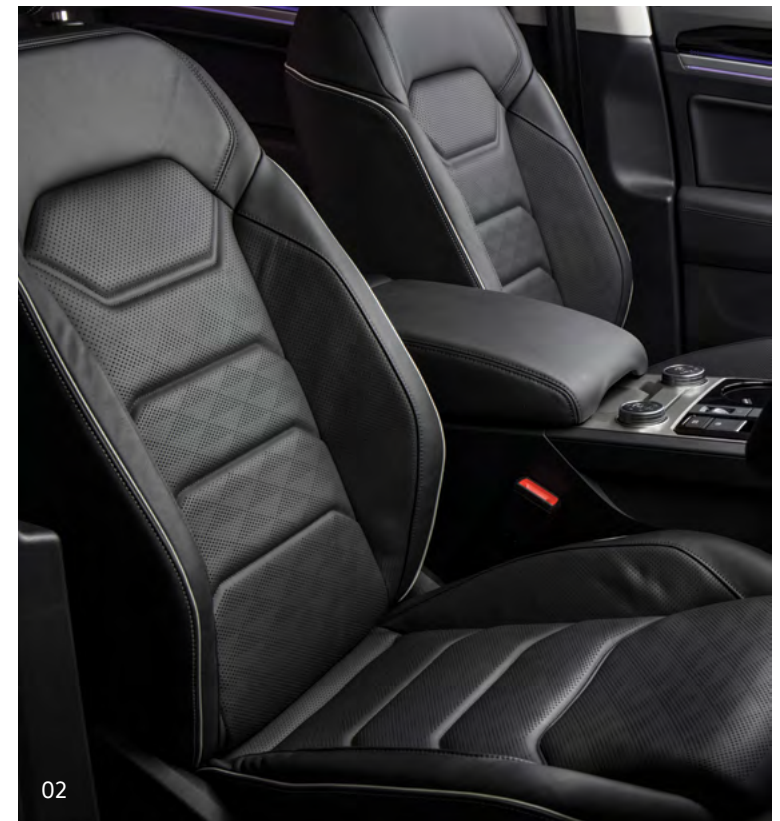

The Touareg's electric front seats have been designed to provide maximum comfort even on long journeys. Driver and front seat passenger can enjoy perfect temperature regulation by altering the heat setting. And front seat occupants in the 190TDI Premium Touareg can revel in the vehicle's ventilated seats with 18-way electrical adjustment, pneumatic side bolsters in both the seat cushion and backrest, and a special massage function with eight pre-set massage programs.

The dashboard is the epitome of sophisticated and functional design. Nestled in front of the three-spoke leather-covered, flat-bottomed steering wheel is the instrument cluster with large multifunction display. It blends into a contoured dashboard that features Volkswagen's impressive 9.2-inch Discover Pro infotainment system with App-Connect~, four USB ports and a facility for inductive wireless charging of your smartphone.

Driver and passengers can maintain the perfect in-cabin temperature thanks to the Touareg's Air Care 2-zone climate control air-conditioning system with hard key control. Switchgear for the vehicle's climate control system falls readily to hand and allows for easy adjustments to temperature and air flow.

Sophisticated touches abound throughout the cabin, such as chrome trim on the air vent surrounds, brushed aluminium inserts on the dashboard and flooring, and a gearshift knob with leather and aluminium finish. Ambient interior lighting lends a distinguished air throughout.

Proving that the Touareg's cabin is as practical as it is classy, there's an impressive 1800 litres of boot space available with the rear seat folded (810 litres with the rear seat upright).

Technology

Few vehicles feature an exceptional array of technological innovation in one package quite like the Touareg.

Standard across the range are practical comforts such as automatic headlights, auto-dimming mirrors and rain-sensing wipers. Other features, such as IQ. Light Matrix LED headlights in the 190TDI Premium variant, appear in a Volkswagen for the very first time. These ingenious headlights not only incorporate a headlight washing system, they use individually controllable LEDs to form a beam pattern that can be adapted to a variety of driving situations.

There's no limit to the multimedia options available to you courtesy of Volkswagen's pioneering 9.2-inch Discover Pro navigation system with Gesture Control and Voice Control. It features App-Connect~ technology that allows access to selected favourite smartphone apps via Apple CarPlay® and Android Auto™, as well as four USB ports.

Other driver aids have been fitted to make driving and life's little challenges – such as parking – that much simpler.

Negotiating shopping centre car parks is a cinch with Park Assist*. It uses Rear View Camera (RVC Plus)* and front and rear parking sensors to carefully guide you into, or out of, tight parking spaces. Other handy features include Keyless Access and Start, which takes the hassle out of getting in your Touareg and driving away, and Driving Profile Selection with 4MOTION Active Control, which allows for customisation of the driving experience.

Also included is Adaptive Cruise Control (ACC)*, an intelligent system that not only maintains a speed set by the driver but keeps a safe distance from the vehicle in front by modulating braking and accelerating as required. Adaptive Cruise Control* is particularly useful when driving long distances, as is Driver Fatigue Detection*, which provides a visual and audible signal when it's time to take a break.

~App-Connect is compatible for selected apps with the latest smartphone versions of iOS and Android, active data service, and connection cable (sold separately).

*Safety technologies are designed to assist the driver, but should not be used as a substitute for safe driving practices.

Safety

Peace of mind is yours when you drive the Touareg. A comprehensive array of active and passive safety features has been included across the range, all of which have been designed and tested with one objective in mind – keeping vehicle occupants and other road users safe.

It's apt that a vehicle as technologically superior as the Touareg should receive safety systems never seen before in the range.

Among the compelling new technology featured in the vehicle is Front and Rear Cross Traffic Assist*, an ingenious aid for helping drivers 'nose out' into traffic when vision of that traffic is obscured. Sensors monitor the area around the vehicle, with optical and acoustic warnings issued when oncoming traffic is detected. The system will implement an emergency stop if it detects that a collision is imminent.

Similarly, Pedestrian Monitoring* will first alert the driver, and then implement an emergency braking procedure if needed, to avoid striking a pedestrian or cyclist about to cross the vehicle's path.

Other safety systems are there for when you need them, such as Traffic Jam Assist*. It uses Adaptive Cruise Control (ACC)* and Lane Assist* with Adaptive Lane Guidance* to maintain the Touareg's distance from the vehicle ahead, and its position within the appropriate lane, in busy stop-and-go traffic.

The Touareg's Emergency Assist* function uses ACC* and Lane Assist* to detect steering, braking or acceleration inactivity on the part of the driver, such as when the driver falls asleep or is incapacitated. The system will initiate an escalating series of attempts to alert the driver, before performing a safe emergency stop as a last resort.

Naturally, these new systems work in concert with Volkswagen's trusted range of established safety features, such as 360° Proactive Occupant Protection*, Side Assist* and more, to prioritise safety with every drive.

*Safety technologies are designed to assist the driver, but should not be used as a substitute for safe driving practices.

Performance

The Touareg's athletic styling and broad stance are the first indication of the performance potential lurking within Volkswagen's latest premium SUV.

With its 3.0-litre turbocharged TDI engine capable of providing an impressive 190kW of power and 600Nm of torque, this is a vehicle that has been built to be driven and enjoyed. The Touareg's figures are up 10kW and 50Nm respectively over the outgoing Touareg 180TDI, offering further proof of its performance credentials.

The Touareg's potent power is transferred to the road via an efficient 8-speed automatic gearbox, which provides seamless shifts under acceleration and deceleration.

Clever 4MOTION permanent all-wheel drive ensures the vehicle retains optimum traction by continually adjusting power distribution to the front and rear axles as needed. Approximately 70 per cent of the power available can be directed to the front axle and up to 80 per cent to the rear axle depending on the driving situation and road surface.

Every Touareg receives 4MOTION Active Control, which allows the driver to tailor his or her driving experience by selecting one of four all-wheel drive modes via a rotary dial – Snow, On-road, Off-road (automatic configuration of the off-road parameters) and Off-road Individual (variable settings).

Driving Profile Selection offers further customisation of the vehicle's performance with a choice of Normal, Sport, Eco, Off-road and Individual driving modes (plus Comfort driving mode in the 190TDI Premium) all selectable from the centre console.

The Touareg inspires confidence no matter the road surface. Steel spring suspension with front McPherson struts provides the Touareg with assured ride and handling, while the addition of 4-corner air suspension with electronic damping in the 190TDI Premium variant means even greater levels of comfort when taking on rough terrain.

With its combination of precision and prowess, Volkswagen's Touareg lays down the performance gauntlet to its rivals in the premium SUV class.

Optional Packages

Touareg drivers wanting to enhance their everyday driving experience with added levels of technology and innovation will want to consider one of several outstanding optional packages.

Included in the Innovision Package, for example, is a 12.3-inch Active Info Display that takes the place of a traditional instrument cluster with high-definition vehicle information such as navigation, assistance and comfort systems. Equally impressive is the windshield-projected Head-up Display, which allows the driver to monitor the vehicle's speed, navigation directions and driver assist systems without having to avert their eyes from the road.

The Discover Premium navigation system takes in-car infotainment to the next level with its 15-inch touch-screen display offering information, communication and entertainment in one integrated package. With Voice Command and Gesture Control functionality, it's also exceedingly easy to use. The addition of a volume scroll wheel in the glossy black centre console means fine volume adjustments can be made quickly and without fuss.

The Innovision Package gives drivers the ability to further customise their vehicle's interior with additional ambient lighting in a choice of 30 selectable colours.

The Touareg 190TDI Premium offers discerning drivers the choice of three additional packages. The Sound & Comfort package offers crystal clear audio with the Dynaudio Consequence Sound System and a raft of conveniences such as Area View, 4-Zone Climate Control with rear seat control panel, memory for front seats, mirrors and electronic steering column, heated outboard seats in the second row and a 90-litre fuel tank.

Selecting the R-Line package bolsters the Touareg's appearance and performance by incorporating striking exterior and interior improvements, 20-inch Nevada alloy wheels, all-wheel steering and electromechanical active roll stabilisation.

The third optional package, Panoramic Electric Glass Sunroof, gives Touareg 190TDI Premium drivers the opportunity to take full advantage of Australia's favourable weather conditions.

Touareg 190TDI Premium with optional Panormaic Sunroof and Sound & Comfort package shown.

Colours & Upholstery

The Touareg 190TDI and Touareg 190TDI Premium are available in six eye-catching paint finishes, including Antimonial Silver Metallic, Aquamarine Metallic, Malbec Red Metallic, Pure White, Silicone Grey Metallic and Deep Black Pearl Effect, with the Metallic and Pearl Effect paint finishes available at an additional cost.

Vienna leather appointed trim in the Touareg 190TDI is soft and supple to the touch, while Savona leather appointed trim in 'Soul' Black or 'Mistral' two-tone in the Touareg 190TDI Premium will have vehicle occupants sitting in the lap of luxury.
